

MEDX Xelerator 2022 Newsletter

We would like to extend our sincerest appreciation to all of our partners and portfolio companies for making this past year a fantastic success.

As we are about to begin 2023, let's have a quick look back at the exciting milestones of 2022.

Happy New Year to one and all!

Highlights

The BeWeld Medical Deal

On October 1, 2022, one of our youngest portfolio companies, BeWeld Medical, signed a strategic investment agreement with [Boston Scientific](#), less than one year after it was established.

Edge Medical Ventures Announced by the WSJ

Israeli Medtech Incubator MEDX Seeks \$60 Million for Venture Fund
MEDX plans to invest in startups it launches...
www.wsj.com

In an interview with the Wall Street Journal, the MEDX Xelerator team announced the creation of Edge Medical Ventures, a venture capital opportunity fund managed by the incubator team as well as external partners. The fund will focus on growing successful incubator graduates as well as other similar stage opportunities. Read the Wall Street Journal article [here](#).

Venture Creation - The XPLORE Program

This year we rolled out our XPLORE program to over 20 Israeli hospitals across the country. In November MEDX hosted its XPLORE program partners for an innovation day at the incubator that included a brief on various aspects of the medical venture creation process including IP, evaluation of market size and business model, venture deals elements, etc.

Many thanks to our partners for their ongoing cooperation: ARC & Sheba Medical Center, Wolfson, Galilee Medical Center, Ichilov Hospital, Beilinson Hospital, Soroka Hospital, Mor Tech Transfer, Meir Hospital & Clalit Hospital.

MEDX Xelerator is inviting entrepreneurs to join its Entrepreneur-In-Residence program which is an integral part of our venture creation activity.

First innovation launch event at Wolfson Medical Center on June 27th

Social Impact Activity – Building Bridges Between the MedTech Ecosystem and Arab Entrepreneurs

On June 30, 2022, we initiated our new impact activity in the north of Israel with the inauguration of the MEDX Xelerator branch in Sakhnin in collaboration with The Portland Trust.

This activity will be growing significantly in 2023 following the establishment of NorthMed – the innovation center to support Arab medtech innovators from the north of Israel.

Our impact activity was highlighted at TheMarker event which hosted CEO MEDX Xelerator LP Shai Policker, Michal Halevy & Cecile Bliliouis for a panel moderated by journalist Amalya Duek at the HR Evolution Conference at the Airport City Convention Center

The Boston Scientific Visit

On December 6, 2022, our partners from Boston Scientific toured the incubator, met the portfolio companies and shared valuable insight. It was a wonderful visit.

From left to Right: MEDX CFO Noam Taichler, BSC Executive Vice President EMEA Eric Thépaut, MEDX CTO Gal Atarot, Boston Scientific CEO Mike Mahoney, MEDX CEO Shai Policker, Head of Israel Site Integration - Urology & Pelvic Health at Boston Scientific Jonathan Rea & Director, Integration & Innovation Strategy Jonathan Goldstein

Cardio-vascular Cluster

A significant portion of our activity centers around heart and vascular diseases and this year was no different:

Welcome Trilio Medical

Congrats to NovaPulse on new investors Almeda ventures and Boston Scientific

The VeinWay team in-action

Append Medical Stars at ICI

On January 23, 2022, Veinway was a finalist in the 2021 Dong Sheng International Science Park Competition. On September 8, 2022, Almeda Ventures joined MEDX Xelerator, Boston Scientific, and the Israel Innovation Authority in investing in vascular medtech startup NovaPulse.

In October 2022, Trilio Medical joined veteran companies Append Medical, Endoways Medical, Veinway and NovaPulse. This strong cluster also shined very brightly during ICI2022 (Dec 4-6, 2022). Append was both a finalist and a winner in the startup competition. Veinway was presented on stage and was in the startup parade.

Digitally-Enabled Cluster

.. SPIE Reveals 2023 Startup Challenge Finalists

PatenSee made the finals in SPIE to be held in 2023. Read on [here](#). CEO Dr. Gal Goshen demonstrated the company's technology to the WHO Director General.

[Exero Medical](#) completed a multi-center clinical study demonstrating its post-surgical tissue healing monitoring technology.

[Synchrony](#)'s LibAiry [#airwayclearance](#) system helped save the life of a [#CF](#) patient while she was waiting for a double organ transplant. This exciting story was first presented by company co-founder Dr. Moshe Ashkenazi at [#NACFC](#). [Read on!!](#)

Synchrony also signed a development & manufacturing agreement with Mego Afek on May 10, 2022 & began preparations for an upcoming clinical trial in 2023 in the US.

An important part of our vision is to develop new sources of data that enhance the ability to monitor and treat patients away from the traditional hospital setting.

Companies in this cluster include: [Exero Medical](#) which provides an unprecedented insight into the recovery of patients post-surgery; [PatenSee](#) which delivers a physical exam of the hemodialysis patients per international guidelines without touching the patients; and [Synchrony](#) which both treats and monitors chronic COPD and CF patients requiring daily airway clearance.

Companies in this cluster all achieved excellent clinical results signaling the shift from the pre-clinical research phase to the diagnosis and treatment of actual patients in various indications.
